

Addendum—Fitting Box Camera with AL-252 on Enclosure

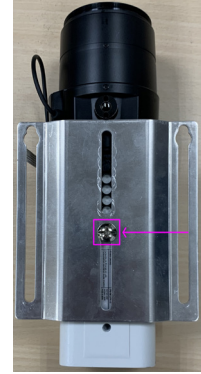

- 1** Place the black plastic plate on the camera, and align its hole with the mounting screw hole of the camera. (Note that you must ensure the lens orients with its flat edge facing the mounting screw hole.)

- 2** Place the metal plate (with the two side screw holes facing forward) on the camera and align the opening to the screw holes.

- 3** Fasten the screw.

- 4** Flip the camera on its axis and place it in the enclosure.

- 5** Fasten the two screws with washers.

- 6** Now, you can close the enclosure with the camera firmly attached.
